

> DISASTER RECOVERY

Protect and archive your data in our secure, state-of-the-art facility at an affordable price based on your individual business needs. Built on award-winning storage networking technology and managed by data protection experts with decades of experience, Netceera is recognized as an innovative leader in the data protection industry.

There are many advantages to Disaster Recovery and Netceera's solutions enable you to your secure business-critical data, protect server workloads and get back online quickly and easily. Our high specification solutions provide you with the ability to cater for a broad range of customers scaling from 1 server through to an office network with multiple servers requiring rapid fail-over protection.

There are many reasons for selecting Netceera for your offsite data protection and archiving, including our immediate deployment, rapid 24/7 data recovery with maximum capabilities. We offer flexible pricing and are cost effective. You have no need to build and staff a dedicated recovery center, or purchase software and hardware for this. Netceera offer rapid compliance deployment with minimal implementation costs and seamless scalability of data storage as your business grows.

We offer end – to end security with proven technology to ensure that with your disaster recovery plan in place, we offer both private and shared spaces equipped with phones, computers, internet access etc. We understand not all businesses are the same, and we are happy to arrange that each relocated staff member has access to their own office station, providing individual personal computers, IP telephony service and data networking access, or even set up the space according to your specific needs whether it is in regards to software, hardware, security, or connectivity, or even duplicating your existing office space!

QUESTIONS? LET US HELP!
