

> CLOUD COMPUTING

Our hosted cloud infrastructure provides you with an agile infrastructure delivered from our secure, highly available data centers so you can respond quickly to your customers' business needs. With our cloud services you focus on your business rather than your IT infrastructure. Scale your business and let us worry about your IT infrastructure.

WHY SWITCH TO THE CLOUD?

Even short periods of downtime can stop staff from working or prevent you from providing services for your clients. In the event of a serious server problem, you could lose valuable data or spend large sums on repair and maintenance bills just to keep your old servers working.

No more servers

By hosting all your data and software in our secure UK data centres, you'll never need to buy a new server again or have to pay the cost of maintaining your server hardware.

Reduced downtime

Switching to our Cloud Solution will eliminate most of the day-to-day IT failures that can prevent your employees from working.

Work from any location

Your employees needn't be tied to a desk, or an office for that matter. They can access their files from any secure location with an internet connection.

No more backups

You never have to worry about having to backup your data either - saving time and reducing the risk of lost data due to server crashes. All your cloud data is automatically backed up to a second data centre.

And best of all, saving money

On average, businesses that switch to cloud computing save around 40% on their IT infrastructure costs. Cloud computing eliminates the expense of supporting and maintaining your servers. What's more, when you switch to us, there are no hidden set-up extras - there's just a competitive monthly fee to pay.

QUESTIONS? LET US HELP!

To speak to one of our Sales Consultants about what our services can do for you, or for any other queries, please call **0800 808 5450** or visit <http://www.netcetera.co.uk/cloud/> for more details.
